

Autoadhesive Rotative 2500 - 6000 B/H

Adhesive system rotary labelling machines 2500 - 6000 B/H

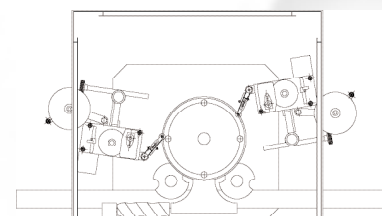

Le etichettatrici della serie AR, autoadesive rotative, sono caratterizzate da stazioni di etichettatura solida e compatta che offrono tutte le regolazioni tri-dimensionali possibili, senza rinunciare alla precisione di applicazione. Grazie a motori a passo da 6,4 A e ad azionamenti di elevate prestazioni, la gamma parte con la macchina più piccola a 3 testine, da 1000/2000 pezzi/h, per arrivare a quella a 6 testine con produttività da 5000/6000 pezzi/h. Le possibilità di confezionamento sono praticamente infinite, sia per tipo di contenitore sia per tipo e dimensione di etichetta.

KOLMAR 1005

The rotary labelling machines with adhesive system of the AR series feature a compact and sturdy labelling station allowing all 3-dimensional adjustments always with utmost precision. Thanks to the 6.4 A step motors and high performance operation, the throughputs start from 1,000/2,000 pcs/h with the smallest 3-head machine to reach 5,000/6,000 pcs/h with the 6-head machine.

The packaging combinations are almost unlimited as to both the type of container and the type and dimensions of the labels.
