KOLMAR 1005

Le etichettatrici rotative della gamma XR, con incollaggio totale a colla fredda, comprendono modelli a 3, 4 o 5 testine, in grado di confezionare dai 1000 ai 3.500 pezzi/h. Il particolare movimento a slitta garantisce il migliore incollaggio possibile ed offre la possibilità di utilizzare anche etichette di tipo avvolgente. Tutte le movimentazioni sono meccaniche, garantendo precisione, solidità e durata di tutto il sistema. Grazie alla semplicità di utilizzo e di pulizia non sembrerà neanche di utilizzare una macchina a colla.

The XR series of rotary labelling machines with cold glue labelling system include 3, 4 or 5 head models suitable to package 1,000 to 3,500 pcs/h the special movement obtained through a slider guarantees as good labelling as possible and gives the opportunity of using also wrap-around labels. All movements are mechanically operated, which guarantees precision, solidity and long life to the whole equipment. Thanks to the simple use and cleaning you would not even notice you are using a glue labelling machine.
